

OWL NIGHT LIGHT

LED Light with Darkness Sensor

Sleepy-eyed owl light to help you calm and relax for bedtime

Switch off your bedroom lights, and little owl will light up and respond with a gentle, "hoot-hoot". Owl light will turn itself off automatically 20 seconds, so you can stay tucked in bed without having to worry about turning it off yourself.

When the sensor on the top senses darkness in the room, LED will light on.

Can switch from Sensor mode to Manual mode to keep light on.

Hoot 🎵
Hoot 🎵

Owl automatically lights up and hoots when its surroundings turn dark (turns off after 20 secs).

Owl light makes for a perfect interior accent piece to give subtle color and presence to your room.
